Could This Be The Season To Refinance?

Below are four reasons refinancing could make good sense for your financial situation.

- 1) Eliminate mortgage insurance and lower your monthly payment
- 2) Use the equity in your house to make home improvements
- 3) Pay off high interest credit cards and reduce your debt
- 4) Lower the interest rate on your existing home loan

Keeping Your Online Accounts Safe

MVCU cares about the security of your personal information. Below are some helpful tips for keeping your personal information safe:

1. Use complex passwords: Using at least 8 characters or more, including a mix of upper and lowercase letters, numbers, and symbols. An example of a great password would be ak380KA36
2. Use different passwords for each of your accounts
3. Change your passwords on a regular basis for all online accounts. Do not use your name and birthdate as part of your password.
4. Keep your password private
5. Do not write down your passwords and keep them in your wallet or purse. If someone was to steal your wallet or you lose it, they will have access to everything. Keep them in a safe place where no one would expect them to be.

Paying Bills Made Easier

"I love to pay my bills," said no one ever. While we can't promise that you'll ever love or even like paying your bills, that chore has never been easier.

When you use MVCU's online bill pay, you can get the job done quickly and efficiently. So instead of searching for your checkbook, pen, and a stamp, you can simply go online to MVCU's web

site. Log in to bill pay and with a few clicks and keystrokes, you're done. You can pay bills in a timely fashion by scheduling them to arrive when they are due. In other words, you can log in on the first of the month to schedule all of your payments, even if some are not due until say, the third week of the month. Signing up for bill pay is easy, too. Just follow the prompts or contact MVCU.
